Xeelo Brings DigitalOps Solution to Blue Prism connected-RPA, helping customers execute digital journeys from start to finish, accurately and efficiently without replacing existing IT environments.

The integration of Xeelo's DigitalOps solution with Blue Prism connected-RPA allows organizations to execute digital processes, end to end, combining workflow/orchestration with GDPR compliance and Master Data and Document Management capabilities, all while enriching data automatically and collecting input through a Digital Workforce.

As part of Blue Prism's Technology Alliance Program (TAP) partnership, the integration adds **Planning & Sequencing** to Blue Prism's Digital Workforce – part of the Six Skills for Intelligent Automation. Now, organizations can optimally plan workflow & workload execution to cover any process, end to end, without replacing existing systems and losing legacy investments.

Digital Replaces Analog, with DigitalOps

For years, organizations have struggled to plan and execute their digital journeys. Many discover that although parts of a process can be digitalized, when looked at end to end, the process continues to live in an analog world – requiring emails, excels, word documents and humans—with data that can change at any time. Automation is challenging enough without replacing existing systems.

Pairing Xeelo's DigitalOps solution with Blue Prism's Digital Workforce finally lets enterprises take a **comprehensive approach to digitalizing all the organization's end to end processes**. Xeelo's DigitalOps solution enables the orchestration of Blue Prism's Digital Workforce as often, and within as many processes as necessary, ensuring complete digital transformation without having to replace any existing IT investments.

How it works

Xeelo DigitalOps focuses on data input as early as possible in the process, replacing emails, excels and human interaction with webpages and mobile apps, to capture data in a structured way. Integrating with Blue Prism's Digital Workforce makes it easy to accept inputs from any existing structured data system, enabling the process to start from anywhere.
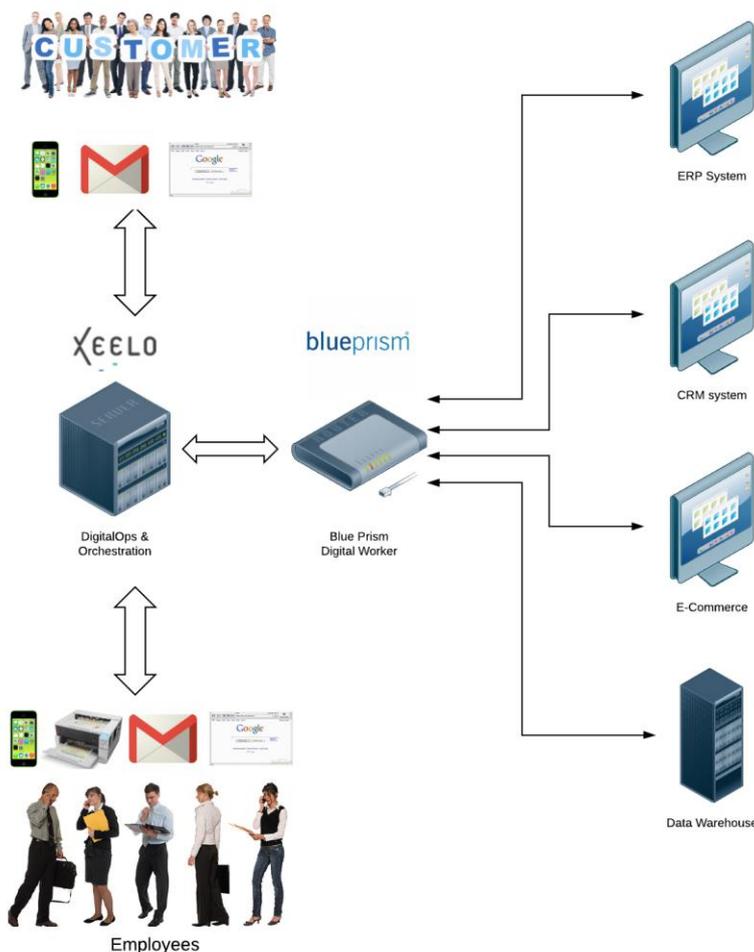

Xeelo combines the required workflow/orchestration with its Master Data and Document Management capabilities, enriching the original data on its Digital Journey and collecting further inputs from Humans or other systems through the Digital Workforce, as necessary.

With the data always in a digital, structured form, Xeelo allows multiple sub-processes to run simultaneously through its orchestration engine (case management as defined by Gartner).

Once all the sub-processes have completed, all the auditable decisions have been taken, all the errors dealt with, and the task/case is ready to be finalized, Xeelo DigitalOps distributes the finalized digital data to end users and systems through multiple channels. This includes data distribution via Blue Prism's Digital Workforce, PDF generation, Mobile notifications and emails.

In addition to managing the process end to end, Xeelo DigitalOps Orchestration also transparently handles all the problems that can occur during a task, including error messages, delays in receiving human input with reminders and escalations, and automated escalation and delegation features.

As the leader in zero-code digital journeys, Xeelo focuses on allowing anyone to easily build applications that execute digital journeys and provides the missing link to execute Digital Strategies. We combine enterprise grade scalability and security together with GDPR and SoX compliant Master Data management, universal workflows and full document management into a single solution.

Blue Prism & Xeelo DigitalOps: End to End Digital Process Execution

As DigitalOps specialists, Xeelo focuses on securely and reliably digitalizing processes.

Utilizing our platform's capabilities to manage processes, Master Da ta and documents, we've built a single, unified solution to manage the Digital Journey of any organization all the way to the end.

- Xeelo DigitalOps allows any process to become Digital from the outset, capturing data in a digital form from the very start, irrespective of where the data originates.
- Xeelo's Master Data and Document Management capabilities further enhance the digital data, working with OCR tools or enriching data automatically.
- Xeelo's Orchestration + Blue Prism connected-RPA ensure that digital communication is managed effectively and efficiently during a process with all existing systems in an organization.
- Xeelo doesn't forget, always monitoring each task to completion, ensuring deadlines are met, issuing automated reminders, escalating tasks or automatically assigned them to different teams.

Summary

The Blue Prism/Xeelo DigitalOps integration gives enterprises the ability to execute their digital journeys from start to finish, ensuring that no part of an End to End process remains in analog form.

Xeelo DigitalOps works by orchestrating together with Blue Prism Digital Workers any interaction with existing systems to ensure that a process has all the necessary data to run from start to finish. It also ensures that any sub-processes or data distribution requirements during a process are fulfilled and met, accurately and efficiently without needing any human interaction or repetitive tasks to be performed.

This finally enables Digital Strategies to be fully executed, without having to make compromises, or stop short of achieving a full digital journey across the organization.

About Blue Prism

At Blue Prism, we pioneered Robotic Process Automation (RPA), emerging as the trusted and secure intelligent automation choice for the Fortune 500 and public-sector market. Now we bring you connected-RPA supported by the Digital Exchange (DX) app store—marrying internal entrepreneurship with the power of crowdsourced innovation.

Blue Prism connected-RPA can automate and perform mission critical processes, allowing your people the freedom to focus on more creative, meaningful work. More than 1,000 major enterprise customers leverage Blue Prism's digital workforce, empowering their people to automate billions of transactions while returning hundreds of millions of hours of work back to the business. Visit www.blueprism.com to learn more.

About Xeelo

Xeelo® is an All-in-One Digital Transformation platform, designed to provide Enterprise grade MasterData Management, Document Management, Workflows and Data Integration capabilities. Developed as a Zero-Code, Self-Service platform, it also includes a full Mobile Application builder, and supports 100% corporate adoption with unlimited, FREE, Requestor users. For more information, visit www.xeelo.com
